Summary

Senior Frontend Developer with 6+ years of experience building scalable, production-ready web applications. Most recently worked at a marketplace company contributing to the Seller Center platform, progressing from Senior Frontend Developer to Frontend Team Lead. Experienced in frontend architecture, performance optimization, and system design in high-traffic production environments. Strong expertise in React, Next.js, and TypeScript, with a focus on clean architecture, maintainable code, and reliable delivery within Agile and CI/CD-driven workflows.

Professional Experience

Renos.id / Home living e-commerce marketplace. Jakarta, Indonesia

Frontend Team Lead - Full Time (Hybrid) Feb 2023 – Feb 2026

- Led frontend architecture and system design for the Seller Center platform, guiding a cross-functional squad of 4 engineers, 1 QA, 1 UX and 1 PM to deliver seller-facing and internal workflows at scale.
- Reduced duplicate development by 40% by standardizing the Renos UI design system and driving adoption across multiple teams.
- Decreased production bugs by 25% by establishing engineering standards and enforcing structured code review governance.
- Improved sprint predictability to 95%+ on-time releases by facilitating daily standups, aligning cross-functional priorities, and proactively removing delivery blockers.
- Minimized integration issues by 35% by initiating API contract documentation to strengthen frontend-backend alignment.

Senior Frontend Developer - Full Time (Hybrid) Sep 2021 – Feb 2023

- Developed and maintained scalable Seller Center features using React and Next.js in production.
- Collaborated closely with Product and Backend teams to translate business requirements into reliable UI solutions.
- Refactored legacy components into reusable patterns, improving maintainability and performance.
- Optimized frontend performance and state management, improving page load time by approximately 20%.
- Mentored junior developer and contributed to internal knowledge-sharing initiatives.

Lab Me Analytics / Health Tech Illinois, United States

Frontend Developer - Contract (Remote) Oct 2019 – Jan 2020

- Faced with usability gaps between design and implementation, translated UX specifications into scalable React interfaces, improving UI consistency and accelerating feature delivery by 20%.
- Addressed recurring data synchronization challenges by integrating frontend features with backend APIs and optimizing state handling, reducing integration errors by 25% and improving production reliability.

PT Idea Nusantara Cipta (Ink & Canvas) / Software House Bogor, Indonesia

Frontend Developer - Full Time Nov 2017 – Aug 2021

- Delivered scalable frontend solutions across multiple client projects, improving delivery efficiency by 25% and reducing revisions.
- Reduced design-to-development rework by 20% by translating mockups into functional, user-focused interfaces.
- Cut duplicated logic by 30% by introducing reusable components and clean code standards.
- Accelerated intern onboarding by 40% through structured frontend mentorship and workflow guidance.

Education

IPB University

Bachelor of Computer Science 2014 - 2017

Diploma of Computer Engineering 2011- 2014

Skills

Programming Languages: JavaScript (ES6+), TypeScript, NodeJS

Frontend Development: ReactJS, NextJS (SSR/SSG), React Native

Architecture: Frontend Architecture, Scalable Component Systems, Design Systems, Web Performance Optimization, Technical Decision-Making

State Management: Redux, Redux Saga, Zustand, useContext

API & Data Handling: RESTful APIs, Axios, React Query, API Contract Documentation

Testing & Quality: Jest, Unit Testing, Code Review Standards, Performance Optimization

Leadership & Collaboration: Technical Leadership, Sprint Planning, Mentoring Engineers, Cross-Functional Collaboration, Code Review Governance

Tools & Process: Git, CI/CD, Agile/Scrum, Data Structures & Algorithms, Third-party Dependency Management
